

## **Composites market: Noticeable growth seen in 2006**

The GRP industry in Europe and the Middle East grew by over 6% in 2006, according to the director of the German-based Federation of Reinforced Plastics (AVK, Frankfurt), who said at a meeting in Stuttgart / Germany. The upturn, which “noticeably surpassed” the 2005 growth of 2%, encompassed almost all markets, in particular, truck production and construction. AVK expects “slightly less impressive” growth, as construction slackens and the industry slows.
