

EPTA publishes programme for 10th World Pultrusion Conference

The European Pultrusion Technology Association (EPTA) has published the programme for its 10th World Pultrusion Conference, taking place on 8-9 April 2010 in Barcelona, Spain.

The [EPTA](#) conference takes place every two years and focuses on the applications for pultruded reinforced plastics.

The conference programme topics include:

- market development in USA, Asia, Europe;
- innovative applications;
- sustainability: technical possibilities, recycling, etc.;
- raw materials;
- fibres and resins;
- construction/testing/calculation; and
- processes.

On the second day of the conference there will be a visit to the Owens Corning plant in Sant Vicenç de Castellet.
